Art Unit: 2833

1. Claim 12 is objected to because on line 9 "on the" should be deleted (as was done on page 5 of the specification). Appropriate correction is required.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Braun, et al. in view of Francis. Francis discloses a grounded support, a smart card and a card holder that comprises a dielectric base and a conductive cover 12. It is indicated that the cover is grounded (abstract, etc.) but the manner in which this is done is not clearly indicated. However, Francis teaches that a hinged cover be grounded through the hinge. Using existing structure in this manner "provides a compact and economical way of implementing a conductive grounding path" as stated in the abstract. For the same reasons, it would have been obvious to use a hinge part of Braun to ground the conductive cover thereof.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daoud is a further example of using a hinge as a conductive path. Bricaud, et al. is a further example of a grounded smart card and card holder.
5. Claims 1-7 and 9-11 are allowed.
